3D Systems Launches Affordable New 3-D Dental Model Production System

- The ProJet™ MP 3000 3-D Printer is Available Immediately -

ROCK HILL, South Carolina, March 3, 2010 – 3D Systems Corporation (NASDAQ: TDSC), a leading provider of 3-D Printing, Rapid Prototyping and Manufacturing parts and system solutions, announced today the immediate availability of its ProJet™ MP 3000, a new 3-D Production System for digital-dental models. The ProJet™ MP 3000 3-D Printer was recently displayed at LMT Lab Days in Chicago, Illinois.

The ProJet™ MP 3000 is the first economical 3-D Production System for small- to medium-size dental labs. This new compact production system incorporates the latest generation of 3D Systems' patented and proprietary Multi-Jet Modeling (MJM) technology with benefits that include crisp feature definition at increased build speeds. The ProJet™ MP 3000 prints dental working models from a new durable, high-contrast material designed specifically for this application.

“We are very pleased to offer our dental lab customers a new solution designed to increase their productivity, quality and accuracy at a lower cost,” said Lee Dockstader, vice president of Business Development at 3D Systems. “We expect this advanced system to enhance the overall user experience and deliver significant performance advancements to our dental lab customers.”
The company believes that the continued introduction of a new generation of dental intra-oral and impression scanners by leading dental companies will drive increased demand for digital-dental working models. The company expects that its ProJet™ MP 3000 will become the low cost dental model maker for small-sized and medium-sized labs.

**Forward-Looking Statements**

Certain statements made in this release that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the company to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in the conditional or future tenses or that include terms such as “believes,” “belief,” “expects,” “estimates,” “intends,” “anticipates” or “plans” to be uncertain and forward-looking. Forward-looking statements may include comments as to the company’s beliefs and expectations as to future events and trends affecting its business and are necessarily subject to uncertainties, many of which are outside the control of the company. The factors described under the headings “Forward-Looking Statements,” “Cautionary Statements and Risk Factors,” and “Risk Factors” in the company’s periodic filings with the Securities and Exchange Commission, as well as other factors, could cause actual results to differ materially from those reflected or predicted in forward-looking statements.

**About 3D Systems Corporation**

3D Systems is a leading provider of 3-D Printing, Rapid Prototyping and Manufacturing systems and parts solutions. Its expertly integrated solutions reduce the time and cost of designing products and facilitate direct and indirect
manufacturing by creating actual parts directly from digital input. These solutions are used for design communication and prototyping as well as for production of functional end-use parts: Our customers Create With Confidence.
