## 3D Systems Presents Its Additive Manufacturing Capabilities at IMTS

- Direct Manufacturing Solutions On Display In The Emerging Technology Center At IMTS 2010-

**ROCK HILL, South Carolina – September 13, 2010** - 3D Systems (NASDAQ: TDSC) announced today that it plans to exhibit examples of its growing direct manufacturing capabilities as part of the Emerging Technologies Center (EMT) at IMTS 2010 (International Manufacturing Technology Show) at the McCormick Convention Center in Chicago, IL, September 13 – 18<sup>th</sup>.

The Emerging Technology Center, presented by the Association for Manufacturing Technologies (AMT) in partnership with the Society of Manufacturing Engineers (SME), showcases the most innovative technological developments for the manufacturing industry in 3-D. The ETC's theme for 2010, "Knowledge-Based," covering manufacturing, people, business and technology, is reinforced through the participation of [3D Systems](#) as the inventor of [Stereolithography](#), the very first additive fabrication technology, over two decades ago. 3D Systems continues to lead and shape the direction of rapid manufacturing with 5 distinct technologies, an impressive patent portfolio and complete design to manufacturing solutions and services.

"Our growing suite of direct manufacturing solutions and services come with the assurance of consistent quality, reduced costs and improved time to market; all critical to the success of small to large manufacturers," said Cathy Lewis, 3D Systems vice president of global marketing. "From [3D Printers](#) and [Production Systems](#) to our [3Dproparts™](#) service, we offer the broadest array of additive and traditional technologies and high performance materials to completely transform manufacturers' workflow, costs and lead-times away from labor intensive traditional methods and into the digital age."

## **Forward-Looking Statements**

Certain statements made in this release that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the company to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in the conditional or future tenses or that include terms such as "believes," "belief," "expects," "estimates," "intends," "anticipates" or "plans" to be uncertain and forward-looking. Forward-looking statements may include comments as to the company's beliefs and expectations as to future events and trends affecting its business and are necessarily subject to uncertainties, many of which are outside the control of the company. The factors described under the headings "Forward-Looking Statements," "Cautionary Statements and Risk Factors," and "Risk Factors" in the company's periodic filings with the Securities and Exchange Commission, as well as other factors, could cause actual results to differ materially from those reflected or predicted in forward-looking statements.

## **About 3D Systems Corporation**

3D Systems is a leading provider of 3D Printers, 3D Manufacturing Centers and 3Dproparts™ solutions. Its expertly integrated solutions reduce the time and cost of designing products and facilitate direct and indirect manufacturing by creating actual parts directly from digital input. These solutions are used for design communication and prototyping as well as for production of functional end-use parts; our customers Create With Confidence.

**About IMTS**

The International Manufacturing Technology Show (IMTS) is one of the largest industrial trade shows in the world, with more than 1,100 exhibitors and over 92,000 visitors. The event is held every two years in September at McCormick Place, Chicago. In addition to a comprehensive technology conference schedule, the 2010 show offers numerous technology areas: Emerging Technology Center (EMT), Advanced Manufacturing Center, Robot Arenas, Manufacturing Museum and Automotive Innovations. Visit [www.imts.com](http://www.imts.com) for details about the 2010 IMTS, September 13 – 18<sup>th</sup>.
