Geomagic Wrap

Scan It, Mesh It, Surface It.
In minutes.
Revolutionize Your 3D Workflows
Geomagic Wrap delivers the most easy-to-use, affordable, fast, accurate path from point clouds to 3D polygonal and surface models that can be used instantly in downstream engineering, manufacturing, engineering, art, industrial design and more. As part of your 3D digital thread, Geomagic Wrap provides the digital bridge to allow you to create perfect data to use directly in 3D printing, milling, archiving and multiple other 3D uses.

With Geomagic's advanced Exact Surfacing tools included Geomagic Wrap delivers power yet ease-of-use in cutting-edge modeling functions for that flawless 3D model. Scripting and macros available also automate functions for repetitive tasks during the reverse engineering process.

Accurately and Effortlessly Build Usable 3D Data
Geomagic Wrap enables users to transform point cloud data, probe data and intermingle imported 3D formats (STL, OBJ, etc.) into 3D polygon meshes and surface models for immediate use. Unique automated tools for rapid point cloud cleanup and surfacing allow you to perform complex tasks quickly and with confidence. Color data from 3D scans can be edited and managed, edited and saved as texture maps for your color 3D prints.

Geomagic Wrap® delivers the industry's most powerful toolbox to transform 3D scan data and imported files into 3D models for immediate use downstream. From engineering to entertainment, art to archaeology and manufacturing to museums, people from every walk of life are effortlessly reverse engineering perfect 3D models from scan data and 3D files using Geomagic Wrap.
Geomagic Wrap's comprehensive toolbox of point cloud and polygon editing features, plus powerful surfacing tools, help you create high-quality 3D models faster.

### Key Features

- **Support for the industry's widest range of non-contact 3D scanning and probe devices**
- **Point cloud editing and fast creation of accurate polygonal models based on the 3D scan data**
- **Powerful Remesh tool for fast, accurate create clean polygon models from dirty scan data**
- **Polygon editing tools for hole filling, smoothing, patching and water tight model creation**
- **Immediately use the data from Geomagic Wrap for 3D printing, rapid prototyping, and manufacturing.**
- **Render your data immediately in KeyShot to make stunning, photorealistic visualizations of your designs**

- **Curve and hard feature extraction from polygon bodies for Design from Scan data applications**
- **Powerful scripting tools enable the extension of Wrap far beyond its off-the-shelf capabilities and the full automation of the routine**
- **Precise surfacing of the model into NURBS using the easy and comprehensive Exact Surfacing interface**
- **Extensive Exact Surfacing tools give more control over your surface quality and layout, and allows for total control over NURBS patch layout, surface quality, and continuity.**
- **File export formats include: WRP, IGES, X_T, SAT, PRC, STEP, VDA, NEU, 3DS, DXF, OOGL, IV, PLY, STL, WRL, OBJ**

3D Systems provides comprehensive 3D products and services, including 3D printers, print materials, on-demand parts services and digital design tools. Its ecosystem supports advanced applications from the product design shop to the factory floor to the operating room. As the originator of 3D printing and a shaper of future 3D solutions, 3D Systems has spent its 30 year history enabling professionals and companies to optimize their designs, transform their workflows, bring innovative products to market and drive new business models.
