

# Appearance Models

3D Systems On Demand parts manufacturing services offers world class appearance model making capabilities.

From small and intricate, fully functional electronic devices for management design review - to full scale, drivable concept vehicles for global launch events, we have the in-house expertise and facilities to help you achieve your project's ambition.

- Fully functional models
- All technologies available inc. electronics, lighting etc.
- Excellent surface treatment capabilities
- Virtually no limits: "You name it (or sketch it) - we produce it"
- Available world-wide

## Lead Times

- Usually 2 to 3 weeks

## Applications

- Automotive industry (cockpits, complete interiors, front-ends)
- Telecommunication (mobile phones)
- Consumer electronics (radios, electric razors, headphones)
- Home appliances (refrigerators)
- Sanitary equipment (washbasins, taps, fittings)
- Medical devices (CT, MRT systems, incubators)
- Offshore equipment

## General Properties

- Industry leading expertise in prototype and low volume part production, based on one single CAD sketch from the customer
- Full featured manufacturing facilities to handle the largest part requirements (additive manufacturing for plastics and metals, CNC machining, toolmaking, sheet metal processing)
- Full part finishing and assembly capabilities
- Decades of knowledge on how to achieve the requirements of diverse industries
- Excellent surface treatment capabilities, including color matching (complete HKS and Pantone range, soft-touch and other effects)
- "All inclusive" with lighting, sensors, controls, programming
- Global centers of excellence
