

3D Systems Leuven is looking for a motivated

COMMODITY MANAGER (M/F)

About 3D Systems Leuven

3D Systems Leuven, formerly LayerWise, is a dynamic and leading enterprise, specialized in 3D Printing of metal components. 3D Systems Leuven is not only a technology developer but also a technology user. This makes us a strong innovation partner for clients in the industrial, medical and dental sector.

With this technology, we build up material in layers using a high intensity laser until it becomes a solid product. Unlike conventional production techniques, this one does not render any material loss, nor does it require any tooling. It does however, enable the designers to manufacture very complex geometries which are not producible using the traditional techniques.

JOB DESCRIPTION

As a team member of the Global Procurement organization, the Commodity Manager will be responsible for procuring machines, assemblies, components, materials and spare parts. He/she will work with assigned suppliers to meet quality, on-time delivery and price requirements, thereby taking initiatives for continuous improvement.

RESPONSIBILITIES

- Build expertise for your commodities and own the supplier relationship
- Ensure parts availability through timely issuance of Purchase Orders and active follow up
- Use KPI's to measure supplier performance and define corrective actions to achieve progress
- Collaborate with SQE, R&D, Manufacturing and participate/take lead in cross functional project teams
- Manage your suppliers to resolve quality & quantity discrepancies and perform risk mitigation
- Establish a reliable and competitive supply base in line with your commodity strategy
- Award business to suppliers which add most value and assure smooth new launches
- Achieve year-over-year targeted cost reductions
- Drive change management to support the move to the 'next level'

PROFILE

- Minimum 8 years of demonstrated and successful procurement experience
- Master or Bachelor in Engineering or Supply Chain, by preference a technical background
- Demonstrated process development and project management skills
- Hands on (dynamic/flexible), initiator, structured, speed of execution, critical, taking decisions
- Strong verbal and formal communication skills, assertive to build network with internal stakeholders
- Ability to define problems, hypothesize, collect appropriate data and draw valid conclusions
- Willingness to visit suppliers on site for follow up and to gain production process expertise

WE OFFER

- A challenging job in a young and dynamic team
- A competitive salary and additional non-statutory benefits
- Career opportunities in a global company with exponential growth.
