Figure 4® JEWEL MASTER GRY

A versatile, high HDT master pattern material for jewelry silicone molds and high visualization detailed prototypes of complex and fine designs.

STUNNING SURFACE FINISH AND HIGH DEFINITION FOR JEWELRY PIECES PROTOTYPING AND PRODUCTION WITH RTV/SILICONE MOLDING

Figure 4 JEWEL MASTER GRY is a versatile master pattern material for high volume jewelry RTV/silicone molds and for prototype/fit models. The material's high heat deflection temperature (300 °C) ensures compatibility with a range of silicones for creating molds used in jewelry casting production workflows.

This material also delivers exceptional precise surface quality for design and functional prototyping, as well as snap-fit and stone-in-place testing. Figure 4 JEWEL MASTER GRY meets biocompatibility standard ISO 10933-5 for cytotoxicity, making it safe for try-ons and fittings.

APPLICATIONS

- High definition master patterns for making silicone or RTV molds especially for high volume, mass production of jewelry designs
- Jewelry design and functional prototyping
- Snap-fit and stone-in-place testing
- Client fit/try-on models

BENEFITS

- Compatible with a range of silicones
- No silicone inhibition
- High visualization
- Safe for extended try-on testing and user fittings
- Jewelry-specific build styles
- MicroPoint™ support tips minimizing support-to-part interaction and support scarring

FEATURES

- High heat deflection temperature
- Exceptional surface finish and fine details definition
- Fast speed:
  - Prototyping speed – 45 mm/hr at 50μm Z resolution
  - Master pattern speed – 15 mm/hr at 30μm Z resolution
- High contrast gray color
- Passes biocompatibility standard ISO 10933-5 for cytotoxicity

Material Processing Instructions

**MIXING INSTRUCTIONS**

**1 kg bottle for Figure 4 Jewelry and Standalone**
- Roll bottle for 1 hour on 3D Systems LC-3D Mixer for first use
- Roll for 10 minutes before subsequent uses

Use the Resin Mixer to stir material in the tray for 30 seconds between print jobs.

**THREE OPTIONS FOR CLEANING**

1. Sonication in IPA
   - Rinse in IPA ≤ 3 min.
2. Non-flammable Sonication
   - Wash in Propylene Carbonate ≤ 5 min.
   - Rinse in 5 wt% Elma Tec A4 solution ≤ 5 min.
3. Manual cleaning
   - Rinse in clean IPA ≤ 3 min.

**DRYING INSTRUCTIONS**

Ambient or air dry ≥ 1 hour or oven dry 50°C (122°F) 10 min.

**UV CURE TIME**

3D Systems LC-3DPrint Box UV Post-Curing Unit: 60 minutes

More details can be found in the User Guide available at [http://infocenter.3dsystems.com/](http://infocenter.3dsystems.com/)
