

Geomagic Freeform

KeyShot for Geomagic Freeform

Create stunningly realistic images of new designs and products using the KeyShot® for Geomagic® Freeform® add on. Whether publishing to a website or creating customer-facing assets, use the Send to KeyShot function on the Geomagic Freeform tool palette to transfer your model from Geomagic Freeform to the KeyShot for Geomagic Freeform HD. Leverage the interactivity and real-time rendering of KeyShot to create beautiful images that not only render in seconds, but also dynamically respond to updates by animating in real time.

Integrated with Geomagic Freeform

With a single click in Geomagic Freeform, automatically initiate a LiveLinking™ session with KeyShot for Geomagic Freeform.

Powered by Luxion®

- Real-time rendering
