

3D Systems is looking for a motivated

## DRUPAL WEB DEVELOPER

---

### About 3D Systems

More than 30 years ago, 3D Systems brought the innovation of 3D printing to the manufacturing industry. Today, as the leading additive manufacturing solutions partner, we bring innovation, performance, and reliability to every interaction - empowering our customers to create products and business models never before possible. Thanks to our unique offering of hardware, software, materials, and services, each application-specific solution is powered by the expertise of our application engineers who collaborate with customers to transform how they deliver their products and services. 3D Systems' solutions address a variety of advanced applications in healthcare and industrial markets such as medical and dental, aerospace & defense, automotive, and durable goods.

### JOB SUMMARY

For our 3D Systems site located in **Ghent**, we are seeking a strong Drupal Web Developer to be responsible for the development and maintenance of a Drupal 9 website. The ideal candidate will have expert knowledge of Drupal 8/9 (backend and front-end) and full-stack web development experience. This individual will be responsible for code contribution, code reviewing, documentation and defining best practices and priorities.

Communication is a key component of this role. You will collaborate with stakeholders from across the organization. You must be able to clearly convey your ideas, and you should be able to listen to, and factor in, feedback from others.

We expect that you will be self-motivated, proactive, and have a working knowledge of current Drupal development and design practices.

### RESPONSIBILITIES

- Creating and maintaining custom Drupal 9 modules to support the website
- Gathering requirements from stakeholders for new website features
- Updating content on the website using the CMS
- Creating Twig templates to display custom content types according to design specifications
- Creating JavaScript interactions to enhance website functionality
- Participating in bi-weekly, Agile Sprints
- Continuous learning on Drupal and web best practices

### PROFILE

- Bachelor's degree in computer science preferred
- Ability to work hands on with a full Drupal 8/9 stack (custom module development, theme tweaks, dev ops)
- Comprehensive knowledge of front-end (HTML, CSS, JavaScript) and backend technologies (PHP) and JavaScript frameworks
- Familiarity with version control systems (Git) and deployment technologies.
- Experience with the Agile/Scrum methodology
- Familiarity with working in a remote team environment
- Knowledge of the Additive Manufacturing industry is a plus

## **WE OFFER**

- A challenging job in a young and dynamic team
- A competitive salary and additional non-statutory benefits
- Career opportunities in a global company with growth opportunities

## **INTERESTED?**
