

Direct Metal Solutions

Precision production metal printing with the DMP printer series, 3DXpert® software and advanced materials

Direct Metal Printing (DMP) gives you complete design freedom to manufacture stronger parts that are light and durable. Design, test and produce metal parts that are simply not possible with standard manufacturing.

Go Further with Direct Metal Printing

UNLOCK YOUR PRODUCT'S POTENTIAL

With complete design freedom, direct metal 3D printed parts can be stronger, lighter, longer lasting and higher performing than machined or cast assemblies. Manufacture superior performing products faster and at a lower cost compared to traditional fabrication methods.

STREAMLINE SUPPLY CHAINS

With DMP, you have complete control over your production without relying on specialty components from suppliers. Print entire assemblies on demand, with fewer components.

ACCELERATE TIME-TO-MARKET

Conduct R&D, develop prototypes and manufacture production parts all in the same system. DMP users design faster and shorten production times. Transform complex assemblies taking hundreds of hours to manufacture and assemble into a single high-value part printed in hours.

INCREASE MANUFACTURING AGILITY

Metal additive manufacturing requires no tooling. You are able to quickly update designs and change production to meet variable market demands.

DMP Flex 100

Flexible metal AM, exceptional quality

Print exceptionally detailed, high-quality parts in an automated and repeatable process ideal for R&D and serial part manufacturing at the tightest tolerances in direct metal printing. The DMP Flex 100 solution includes extensively tested parameter databases on CoCr, 316L and 17-4PH.

INDUSTRY'S BEST SURFACE FINISH

Reduce machining or polishing of final parts.

CLEAN AND SAFE

Sealed powder loading and recycling prevents material contamination and increases operator safety.

EXCEPTIONAL MECHANICAL PROPERTIES

Roller compaction yields higher density and uniform mechanical properties.

UNMATCHED PRECISION

Print the finest features with exceptional accuracy.

INTEGRATED METAL PRINTING

DMP printers, 3DXpert® software and materials are fine-tuned for process reliability and repeatability.

DMP Flex 200

Professional and precise—now with 500W laser source

Outstanding accuracy, repeatability, and the industry's best surface finish, this printer is designed for applications that have intricate features and thin walls. It features an enlarged build platform for next-day delivery of finished parts. Parameter databases for CoCr and Titanium alloys are available on the DMP Flex 200.

HIGH PERFORMANCE AT LOWER COST

The build volume and 500W laser source lead to reduced cost per part and faster delivery times. Print your high quality parts with fewer supports and visibly better surface finish, resulting in less post processing and material usage.

STREAMLINED DENTAL WORKFLOW

3DXpert Dental automates part orientation, support generation, labeling and nesting. Prepare quality parts in the shortest time.

The Benefits of Direct Metal Printing

CONFORMAL COOLING

Direct integration of conformal cooling channels into this blow mold increases efficiency by 30%.

ENHANCED FLUID FLOW

For this turbine inlet guide vane, computed fluid dynamics simulation predicts a 70% reduction in shock intensity.

SIMPLIFIED ASSEMBLIES

Replacing a complex assembly, this single burner component contains nine under-cuttings and six internal cavities.

TOPOLOGY OPTIMIZATION

Topology optimized aerospace bracket reduces weight by 35%.

REDUCED WEIGHT

Complex lattice structures allow significant weight reduction for this combustion chamber.

MASS CUSTOMIZATION

Designed to perfectly fit the obstructed zone, this reconstruction corrects the patient's facial asymmetry.

DMP Flex 350 and DMP Factory 350

High precision, high throughput

DMP Flex and Factory 350 offer fast build turnaround times in demanding serial production environments.

INTEGRATED METAL PRINTING

DMP printers, 3DXpert software and materials are fine-tuned for process reliability and repeatability.

STRONGER MECHANICAL PROPERTIES

Industry's lowest O₂ content during builds (<25 ppm) for exceptionally strong parts of high chemical purity.

EXTENSIVELY TESTED MATERIALS

Thousands of hours of parameter optimization ensure predictable and repeatable print quality with a broad range of materials.

HIGH QUALITY POWDER MANAGEMENT

DMP Factory 350 comes with integrated and automated powder management at the same footprint as the DMP Flex 350.

DMP Flex 350 Dual and DMP Factory 350 Dual

Achieve high quality performance even faster

DMP Flex 350 and DMP Factory 350 systems now come in a two-laser configuration, reducing build times by up to 50 percent. Boosting productivity while maintaining high quality and repeatability yields lower operational costs.

Our Dual configurations feature our signature vacuum chamber with industry-leading O₂ handling and an intuitive user interface with guided print cycles. Additionally, the DMP Factory 350 Dual integrates powder management into the printer.

DMP Factory 500

Modularity for a scalable factory solution

The DMP Factory 500 Solution is comprised of modules designed to maximize efficiency. Each module is designed to execute a specific function of the additive manufacturing process, i.e. printing (Printing Module), depowdering (Depowdering Module), recycling (Powder Recycling Module) and transporting (Transporting Module). The modules are fully integrated with a Removable Print Module, designed to enable continuous production workflow. The Removable Print Module is sealable to ensure an inerted powder environment throughout the whole manufacturing process. Printer modules are designed for ongoing, 24/7 printing of parts. The Depowdering Module and Powder Recycling Module are designed to efficiently depowder parts on build platforms and automatically recycle unused powder materials, respectively, to prepare the Removable Print Module for the next build.

SEAMLESS LARGE PARTS

The intelligent laser configuration and 3DXpert software-driven scan technology enable the production of seamless large parts the size of the full build volume. This results in the highest surface quality for metal 3D printed parts with outstanding material properties.

UNIFORM, REPEATABLE QUALITY

The Removable Print Module provides consistent powder control, batch after batch to deliver scalable metal additive manufacturing.

HIGH PRODUCTIVITY

With a large build volume (500 x 500 x 500 mm) and high throughput enabled by multiple lasers, the DMP Factory 500 Solution delivers high productivity in metal additive manufacturing.

OPTIMIZE YOUR WORKFLOW

Workflow optimized solution for massive scalability, repeatable high-quality parts, high throughput and low total cost of operations.

Metal Alloys for the DMP Series

3D Systems' broad range of ready-to-run LaserForm materials is formulated and fine-tuned specifically for 3D Systems DMP printers to deliver high part quality and consistent part properties. 3D Systems provides a print parameter database that has been extensively developed, tested and optimized with materials in 3D Systems' part production facilities. These facilities hold the unique expertise of printing over one million challenging metal production parts in various materials year over year. 3D Systems also employs a thorough Supplier Quality Management System to deliver consistent, monitored material quality for reliable results.

Heat exchanger with complex cooling channels in LaserForm AlSi10Mg (A)

Minireactor for scale testing built in LaserForm 17-4PH (A)

Gas burner with integrated cooling channels in LaserForm Ni718 (A)

Partials, copings and bridges production in LaserForm CoCr (C)

High corrosion resistant impeller in LaserForm 316L (A)

Blow mold with conforming holes in LaserForm Maraging Steel (B)

Topologically optimized rocker bracket in Certified Scalmalloy

Injection molding tool with conformal cooling in Certified M789

Short wavelength EMS collimator in Tungsten

Belled end reducer in Certified CuNi30 (A)

DMP MONITORING FOR REAL-TIME PROCESS MONITORING

Advanced Manufacturing requires close monitoring of process variables. DMP Monitoring is a process monitoring and non-destructive quality control system, providing a wealth of data for informed decisions on product quality and also serving as process traceability and documentation for highly regulated industries.

FASTER DATA PREPARATION AND EXCEPTIONAL BUILD OPTIMIZATION

3DXpert software, 3D Systems' precision metal printing solution, is delivered with every DMP printer. Benefit from intelligent design tools and fast build preparation, relying on the extensively tested build parameter database for your material of choice. No other software lets you localize print strategies for increased precision of metal parts.
