

# Digital Texturing

- ✓ Prepare parts with textures to enhance realism and tactility of functional surfaces
- ✓ Intuitive and easy-to-use tools tailored with AM in mind
- ✓ Increase efficiency with software consolidation

## Prepare Parts with Texture and Realism

Design appealing end-use parts with functional surface qualities that mimic that of injection molding. Add grip, minimize visible artifacts, or simply enhance the visual appeal of objects produced with 3D Sprint and your 3D Systems printer.

## Intuitive Easy-To-Use Tools

Design your digitally textured surfaces quickly and easily with a streamlined software feature set built with AM in mind.

## Increase Efficiency With Software Consolidation

The 3D Sprint Digital Texturing Add-On significantly reduces or eliminates the need to rely on external design tools to create parts with injection molding aesthetics for your 3D Systems printer. Reduce wasted cycles moving files around between softwares. Lower the risks of running a mixed software environment, and reduce your overall operating expenses with a single software solution using simple and fair pricing.

3D Systems provides comprehensive 3D products and services, including 3D printers, print materials, on-demand parts services and digital design tools. Its ecosystem supports advanced applications from the product design shop to the factory floor to the operating room. As the originator of 3D printing and a shaper of future 3D solutions, 3D Systems has spent its 30 year history enabling professionals and companies to optimize their designs, transform their workflows, bring innovative products to market and drive new business models.
