

Waste Management

Overview

We are committed to being responsible stewards of the environment as we operate our business, collecting data on our waste across our sites. In 2023, we expanded our measures within our facilities to better understand our waste management and recycling activities. Our internal metrics are used to provide insights to management as we evaluate environmental strategies around further minimizing waste.

Metrics

Waste and Recycling¹

Waste Type	2023	Unit
General, non-hazardous waste	1,166,699	Quantity of waste generated (kg)
Hazardous waste	145,676	Quantity of waste generated (kg)
Recyclable waste (Business & Production)	240,308	Quantity of waste generated (kg)
Electronics Recycling	12,842	Quantity of waste generated (kg)
Wood Recycling	7,784	Quantity of waste generated (kg)
Total	1,573,309	

¹ 3D Systems' waste and recycling data was collected based on requirements defined by the Global Reporting Initiative (GRI) Universal Standard and the World Resource Institute's (WRI) Corporate Value Chain (Scope 3) Accounting and Reporting Standard. 3D Systems' 2023 waste and recycling activity data was subject to third-party verification.
