

3D Systems Belgium is looking for a

QUALITY CONTROL OPERATOR

About 3D Systems Belgium

3D Systems Belgium, formerly LayerWise, is a dynamic and leading enterprise, specialized in 3D Printing of metal components. 3D Systems Belgium is part of the international company 3D Systems.

3D Systems is a renowned developer of 3D-printers and a contract manufacturer of 3D printed parts. The synergy of both activities makes us a strong innovation partner for customers in the industrial and healthcare sector.

We believe in a culture of open communication, supporting each other and the value of trust & respect for the individual.

JOB SUMMARY

As a Quality Control Operator at 3D Systems, you will play a crucial role in ensuring the highest quality standards of our 3D printed products. You will be responsible for the detailed inspecting, testing and validation of finished parts to confirm compliance with technical specifications and customer requirements. Your precision, technical expertise and dedication to quality will contribute directly to maintaining our reputation for delivering exceptional, on-time results.

RESPONSIBILITIES

- Perform dimensional, visual, and functional checks of 3D printed parts to verify conformance to specifications and quality standards.
- Accurately document inspection results and maintain comprehensive quality records.
- Create, review and approve quality documentation such as a Certificates of Conformity and Inspection plan sheets.
- Document and report any deviations or defects found during inspections and collaborate with the Quality Engineering team to resolve issues.
- Support post-processing activities to ensure quality and delivery on time.
- Collaborate with engineering teams to continuously improve quality control procedures.
- Coordinate and prioritize the delivery of high-quality production parts.
- Follow all safety and quality guidelines to maintain a safe and efficient work environment.

PROFILE

- Ability to work independently while contributing to a team environment.
- Strong attention to detail with the ability to identify defects or inconsistencies.
- Problem-solving mindset and capable of troubleshooting issues.
- Good communication and organizational skills.
- Experience with the measurement tools such as calipers, pin and thread gauges, and 3D scanning equipment (GOM/ATOS, Keyence VL and other) is a plus.
- Prior experience in quality control or inspection in a manufacturing or 3D printing environment is a plus.
- Good visual judgment (good color and shape understanding).
- Experience in reading and understanding of technical drawing is a plus.
- Knowledge of 5S, GDP and GMP is a plus.
- Knowledge in ISO9001, ISO13485 and AS9100 is a plus.
- Motivated person with passion to learn new things.
- Good understanding of Dutch and English.

WE OFFER

- A challenging job in a young and dynamic team
- A competitive salary and additional non-statutory benefits
- Career opportunities in a global company with growth opportunities
